## Jeff Glenn and Carbir Cars Announce '97 Racing Program

Grafton, WI - November 27

Carbir Race Cars announced today that Jeff Glenn, 24, will compete in SCCA Pro Racing's American City Racing League (ACRL) series, in addition to selected SCCA National races in the new Carbir CS2 Sports 2000. Glenn is 1995's ACRL Rookie of the Year and "Rising Star", and in '96 qualified on the front row in five of the eight ACRL races, and collected his first professional victory.

The Carbir CS2 Sports 2000 made its' debut at the last ACRL event in Reno, where in the capable hands of FF2000 Series Champion, Steve Knapp, it grabbed the pole by .4 seconds over Glenn in a Swift.

The Carbir has continued to demonstrate its speed and potential in testing conducted at Thunderhill Park. With Glenn in the car and Eric Purcell engineering, the Carbir easily broke the existing ACRL records even before a optimal setup was reached. "The testing went well; we proved that the car is fast and established a direction for further development. With a few simple adjustments, the Carbir became easier to drive and we kept going faster. We just scratched the surface with this first round of testing. I can't wait to get back in the car." Glenn said.

Carbir Race Cars Inc. will run the Carbir in sports 2000 configuration at the first round of the SCCA Nationals in Florida at Sebring and Moroso in January with Glenn driving. ACRL sponsors, Hoosier Tires and Daeco

fuels will provide product assistance for the car's debut in SCCA National racing.

Carbir is taking orders now for customer cars, and is finalizing details with Northern California's Bank of the West with regards to a financing program that will allow the sports 2000 buyer to get into a new car with less cash outlay than most rebuilds of older cars. Details of the program are available from Carbir Cars.
