## Jeff Glenn, Carbir will field entry in ACRL, S2

By Brian Utt

**GRAFTON, WI, Nov. 25**—Carbir Race Cars announced today Jeff Glenn, 24, will compete in SCCA Pro Racing's American City Racing League (ACRL) series in the new Carbir CS2 Sports 2000.

Glenn, of Pleasanton, CA, was the ACRL's 1995 Rookie of the Year and also won the '95 "Rising Star" award. During the '96 season, Glenn qualified on the front row for five of the series' eight races and collected his first professional victory.

Carbir and Glenn also plan to compete in selected SCCA National point races and seek to qualify for the Valvoline Runoffs.

The Carbir CS2 Sports 2000 made its debut at the final '96 ACRL event in Reno, where, in the capable hands of FF2000 Series Champion Steve Knapp, it grabbed the pole by .4 seconds over Jeff Glenn in a Swift DB-5.

The Carbir has continued to demonstrate its speed and potential in testing conducted at Thunderhill Park in Willows, CA. With Glenn in the car and Eric Purcell engineering, the Carbir easi-

ly broke the existing ACRL records even before an optimal setup was reached.

"The testing went well; we proved the car is fast, and established a direction for further development. With a few simple adjustments, the Carbir became easier and easier to drive, and we kept going faster. We just scratched the surface with this first round of testing, and I can't wait to get back into the car," Glenn said.

Carbir Race Cars Inc. will run the Carbir in Sports 2000 configuration at the first round of SCCA Nationals in Florida at Sebring in January with Glenn driving. ACRL sponsors Hoosier Tires and DAECO fuels will provide some product assistance for the car's debut in SCCA National racing.

Carbir is taking orders now for customer cars, and is finalizing details with Northern California's Bank of the West with regards to a financing program that will allow the Sports 2000 buyer to get into a new car with less cash outlay than most rebuilds of older cars. Details of the program are available from Carbir Cars (414) 377-2850.
